

what is happening with Sinclair's ability to force air stations to air one sided documentaries such as the Kerry "episode is very dangerous for Democracy. Too much control, too much power for one company. It does not serve the public interest for all. Bad. The public air waves are not to be used for one sided issues. I want to see real stories not this crap. The FCC needs to do more work in checking licenses and renewals in these areas. I am an American citizen and that is very important to me and I want my voice heard. Thanks You.
